Dear students,

The energy market is one of today's most fast paced, decisive and profitable industries and crucial to both the global economy, the environment and our future society as a whole.

Climate and economic changes, public opinion, technological progress and regulation shape unforeseen challenges and opportunities. This situation calls for new solutions to be delivered by highly skilled and appropriately trained experts with an all-embracing overview, an international outlook and the will to create a true impact. Due to its economic, entrepreneurial and industrial strength as well as its successful and progressive energy policies, the —Energiewende—, Germany stands out as a front runner in the global energy transition. The industry, therefore, requires broadly skilled individuals who are experts in the field.

We are delighted to welcome you to this exciting TU program, where faculty and industry experts convey the latest scientific and practical insights the field, discuss today's challenges, and prepare students for leading roles in shaping the industry, and society, for the future ahead.

Modular Structure

The master program is taught over a period of three semesters. The first semester covers the technical, economic, entrepreneurial and legal foundations for management decisions in the energy sector; the second semester deepens this view and looks at business practises, primarily of grid-based utilities, and investment; the third semester broadens the view while simultaneously focusing on practise according to student's individual interests. All semesters include lectures, tutorials, seminars as well as company visits, online materials related to practice and extracurricular activities. The master thesis, due in the third semester, concludes the program.

Outline

Location and Times

Lectures, tutorials, consultancy and company presentations take place at House 9, EUREF-Campus, 10829 Berlin, room S5 / at the TUB Main Campus, Building EB, room 407 or as announced via Moodle.

Lectures

Lectures are held by professors and academic staff of TU Berlin and other universities, and by professionals of the energy industry. They convey the core teachings. Group work is frequent. Homework may be assigned. Lectures start on time!

9.30 - 13.00
14.00 – 17.30

Tutorials / Company Visits

Tutorials
08.00 - 12.00, 13.00 – 17.00

Company Visits
14.00 – 16.00 or Day Trip

Tutorials are mostly held by research associates and assistants of the respective chairs. Of a generally more interactive nature, they repeat lecture material, supply supportive information, offer additional training, and help prepare for lectures and exams.

Company Visits/Presentations are regularly scheduled on Wednesdays or Thursdays. Company Presentations take place on EUREF Campus, House 9, Room S5, whereas Company Visits give the opportunity to go and see the company on-site and see course-content more lively presented. Registration before attendance may be required.

German for Beginners Class

Level A1.1: tba

Level B1.1: tba

Language classes incur a small additional fee. Advanced language classes are available, for which the taking of a test is mandatory.

E-Learning Platform 'Moodle' and WirelessLAN

Information **S**ystem for **I**nstructors and **S**tudents (ISIS)/Moodle is a software for online learning platforms for announcements, distribution of material, registration to events, etc. An introduction will be given in the first week. Please log on frequently, even in lecture free times. The TU Berlin offers WirelessLAN (WLAN) with full coverage across its campus. Students have the possibility to access the internet from any point on the campus.

Exams

A written (e-) exam, paper, presentation, or portfolio concludes each module. Everything that was taught in the lectures, tutorials, and compulsory Company Visits within the module may be subject to examination. Exams start on time! A failed examination may be repeated twice. For further details, please refer to the official Study and Examination Regulation.

Aims and Scope

This module revisits and broadens students' knowledge of energy technologies and systems in the context of today's changing world, preparing the ground for the coming modules. Students are taught to apply this knowledge independently to selected cases. Module 2, Economics, runs in parallel.

Keywords

Energy physics and energy technologies; thermodynamics; mechanics; chemical processes; Carnot engines and cycles; fossil fuels and renewable energy sources; conversion technologies; recent global and local developments; storage and transport technologies; electrical engineering; grids; transitions and trends.

Schedule

Fri. 18/10/19 **Lecture: Introduction – Energy and Energy Markets**
Prof. Dr.-Ing. Joachim MÜLLER-KIRCHENBAUER

Sat. 19/10/19 **Lecture: Renewable Energy Sources**
Prof. Dr.-Ing. Joachim MÜLLER-KIRCHENBAUER

Must attend one tutorial according to prior registration:

Mon. 21/10/19 Tutorial (Group I): Thermodynamics, Renewables
M.Sc. Benjamin GROSSE

Tue. 22/10/19 Tutorial (Group II): Thermodynamics, Renewables
M.Sc. Benjamin GROSSE

Wed. 23/10/19 Tutorial (Group III): Thermodynamics, Renewables
M.Sc. Benjamin GROSSE

Fri. 25/10/19 **Lecture: Power Grids and Dynamic Grid Control**
Prof. Dr.-Ing. Kai STRUNZ

Must attend one tutorial/company visit according to prior registration:

Mon. 28/10/19	Tutorial (Group I): Power Grids Dr.-Ing. Maren KUSCHKE <i>Company Visit:</i> Vattenfall Berlin
Tue. 29/10/19	Tutorial (Group II): Power Grids Dr.-Ing. Maren KUSCHKE <i>Company Visit:</i> Vattenfall Berlin

Supervisors Individual.

Aims and Scope

Students demonstrate with the Master Thesis to be capable to address a problem from their study program independently, based on scientific methods, within a specific deadline. Once registered for the thesis, students have four months to conclude.

Schedule

To start the master thesis, 62 CP must have been gathered; this equals successful completion of all mandatory modules M1-M7. Technically, the earliest starting date is hence six weeks after the last exam. The thesis can be postponed but should be completed in the third term.

Contents Individual.

Form Fifty pages, plus introduction and annex(es). In English. Scientific standards prerequisite. More detailed formal requirements to be announced.
